## MultiFrame – Window inner frame with blackout blind and mosquito net roller blind

- Can be shortened in length and width
- Infinitely adjustable
- Magnetic closure

The MultiFrame window inner frame is customizable and universally applicable, fitting most windows on the market, both round and rectangular. Quick installation – just four screws, hidden behind the corner covers. The system can be adjusted in height and width as required (Reimo recommends having this done by a specialist dealer).

The UniFrame window inner frame is available in 5 different sizes and can be used for almost all vehicle windows of the same size. Equipped with a blackout pleated blind and mosquito net, it offers privacy in the vehicle and protects against annoying insects.

The frame is screwed into place at all four corners of the vehicle using the appropriate screws (included in delivery). Aluminum profiles in matt black cover the mounting holes and create a high-quality look without visible screws.

Four spacer profiles are included in the scope of delivery.

The UnderCover window inner frame has been specially developed for concealed installation behind a vehicle interior panel or a self-made inner frame. This allows the UnderCover interior frame to be installed almost invisibly in the vehicle and customized to suit individual preferences. The height of the system can be adjusted as required (Reimo recommends having this done by a specialist dealer). The blackout pleated blind and mosquito net roller blind offer privacy in the vehicle and protect against annoying insects.

Aluminum frame color: silver, blackout pleated blind color: white.
